

## Press Release

*QuickTurtle Books®* of Fairview, Michigan is proud to announce their new book release *Seeding the World, The New Rotational Cash Crop for American Farmers*. This book is a stepping stone and a golden opportunity for farmers across the USA. In partnership with Kenaf Partners USA, farmers have a ground floor opportunity to learn about, plant, grow and harvest the hibiscus plant “kenaf” for its precious seed. Kenaf Partners USA’s Pilot Seed Growing Program is underway and should prove to be key to opening doors to kenaf as a rotational cash crop in the very near future. Obtained seed production and new knowledge should contribute markedly to existing and new businesses across the Nation.

This book was written and created by Richard Rensberry of *QuickTurtle Books®* and *Small Business Marketing Magic* after an extensive interview with Bob Lawrason of Kenaf Partners USA. Bob is becoming the Kenaf go

to guy in the USA and is located in Onaway, Michigan. For more information:
